AdaniOne — UX Research & Usability Study

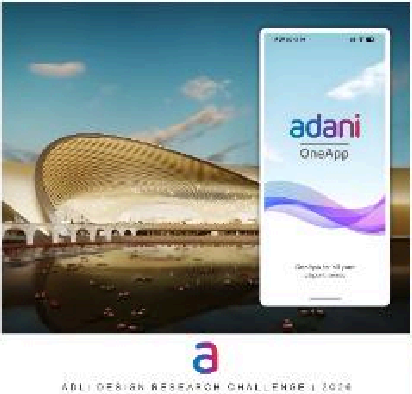
Adani Digital Labs · UX Research Challenge | [illegible] | Solo Researcher

Insight Report Pdf | Full Research Board

A UX research challenge set by Adani Digital Labs — to evaluate high-impact user journeys for India's largest airport super app. Received senior-level validation that the work showed the thinking of a mid-senior researcher, was genuinely empathetic, and saw the product as a physical-digital ecosystem rather than a screen.



ADL | DESIGN RESEARCH CHALLENGE | 2026

FEATURES

Travel Bookings:
1. [illegible]

F&B:
1. [illegible]

Financial Services:
1. [illegible]
2. [illegible]
3. [illegible]

Shopping and Payments:
1. [illegible]
2. [illegible]
3. [illegible]

Connectivity:
1. [illegible]

Airport Services:
1. [illegible]
2. [illegible]
3. [illegible]

Travel and Airport essentials:
1. [illegible]
2. [illegible]
3. [illegible]

The Project Brief:

AdaniOne is Adani Group's all-in-one travel and airport super app — unifying flight bookings, airport services, duty-free shopping, F&B pre-ordering, lounges, rewards and payments into a single digital experience.

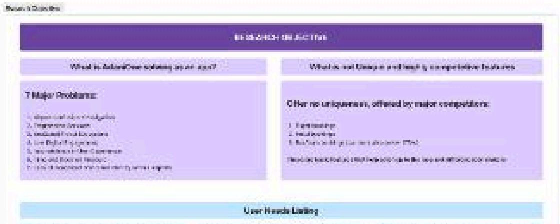
Launched in December 2022. Rated [illegible] on Google Play, [illegible].

Understanding the Product First:

Before researching users, I mapped the product completely — its 7 core problem areas, its full feature taxonomy, and critically, what AdaniOne does that no competitor can.

Key competitive finding: flight bookings, hotel bookings, and [illegible] bookings offer no real uniqueness — MakeMyTrip and Cleartrip already do this.

AdaniOne's real differentiation lies in airport-specific operational data across 7 Adani airports, the only full airport services stack in one place, an earn and burn loyalty loop tying infrastructure + travel + retail, and deep [illegible] across multiple Adani-owned airports that nobody else can replicate.

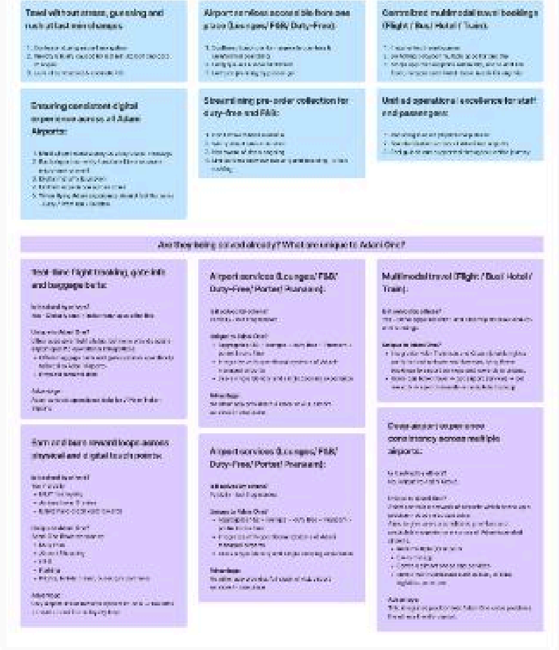


Research Objectives

RESEARCH OBJECTIVES

What is AdaniOne solving as an app?	What is not Unique and highly competitive features
7 Major Problems: 1. [illegible] 2. [illegible] 3. [illegible] 4. [illegible] 5. [illegible] 6. [illegible] 7. [illegible]	Offer no uniqueness, offered by major competitors: 1. Flight bookings 2. Hotel bookings 3. [illegible] [illegible]

User Needs Listing



Travel without stress, guessing and rush at last min changes.

Airport services accessible from one place (Lounges/ F&B/ Duty-Free).

Centralized multimodal travel bookings (Flight / Bus/ Hotel / Train).

Ensuring consistent digital experiences across all Adani Airports:

Streamlining pre-order collection for duty-free and F&B:

Unified operational excellence for staff and passengers:

Are they being solved already? What are unique to Adani One?

Real-time flight tracking, gate info and baggage belts:

Airport services (Lounges/ F&B/ Duty-Free/ Porter/ Pranaam):

Multimodal travel (Flight / Bus/ Hotel / Train):

Earn and burn reward loops across physical and digital touchpoints:

Airport services (Lounges/ F&B/ Duty-Free/ Porter/ Pranaam):

Cross-airport experience consistency across multiple airports:

Why Depth Over Breadth:

[illegible]

> *"The biggest challenge was not finding issues — it was deciding what to focus on and what to leave out."*

Users & Persona Cards

USER PERSONAS AND ARCHETYPES

BUSY BUSINESS TRAVELLERS

Name: Rohan Mehta
Role: Regional Sales Manager, FMCG
Age: 34
Location: Mumbai, India
Quote: "If I can lock lounge entry, grab coffee without a line, and see gate/belt updates in one place, I'm golden."

About Rohan
Flies 2–3 times a month on tight turnarounds. He needs live flight status with gate and baggage belt info, airport Wi-Fi, F&B pre-order, and lounge pre-booking with card-eligibility checks—all without switching apps.

Behavioral Considerations
- Highly task-oriented; prefers one-tap access to essentials (Wi-Fi, lounge QR, flight tile, food near gate).
- Responds to proactive notifications for gate changes and boarding calls.

Frustrations
- Lounge overcrowding and aggregator tech outages have burned him before.
- Walking back and forth for meals due to long queues at peak times.

Goals
- Guarantee lounge access in advance; skip queues.
- Maintain connectivity and move gate-to-gate efficiently.

Tasks
- Add flight to watchlist; receive live status + gate/belt updates.
- Tap to unlock free airport Wi-Fi via the app.
- Pre-book lounge and verify card eligibility to avoid walk-in uncertainty.
- Pre-order F&B at an outlet closest to his gate.

DEAL-SEEKER DUTY-FREE SHOPPERS

Name: Arjun Khurana
Role: IT Consultant
Age: 30
Location: New Delhi, India
Quote: "I want airport-only deals locked in before I reach the terminal."

About Arjun
Hunts promos and pre-orders duty-free to guarantee pricing and pickup at the airport (e.g., Mumbai Duty Free). He also uses Adani Rewards and emerging multi-cart / group ordering flows when travelling with friends.

Behavioral Considerations
- Compares prices across trips; saves wishlists for upcoming flights.
- Likes to redeem points aggressively on the next purchase.

Frustrations
- Unsure about stock availability at pickup time.
- Confusion between arrival vs. departure pickup rules.

Goals
- Lock best deals ahead of travel; frictionless pickup.
- Maximise rewards earn/burn value.

Tasks
- Browse duty-free catalogue; pre-order items and choose pickup counter.
- Place group/multi-cart orders when travelling with friends.
- Redeem Adani Rewards on checkout.

RAIL-TO-AIR CONNECTORS (Multi-modal Planners)

Name: Pooja Iyer
Role: SME Owner (e-commerce)
Age: 29
Location: Jaipur, India
Quote: "I plan train + flight + hotel in one shot—fewer tabs, fewer surprises."

About Pooja

Stitches modes to optimize cost and time: trains/buses for legs, then flights/hotels for the main trip, and airport cabs at either end—all from inside one app, earning points along the way.

Behavioral Considerations
- Wants one itinerary view with all PNRs and policies in one place.
- Accepts upsells if they reduce risk (e.g., lounge during tight connections).

Frustrations
- Managing multiple PNRs and rescheduling penalties across providers.
- Last-mile cab uncertainty at airport arrivals.

Goals
- Book multi-modal trips in one flow; view everything together.
- Reduce disruption risk with smarter add-ons (lounge, alerts).

Tasks
- Search & book flights, hotels, trains, buses inside the app.
- Add airport cab to the itinerary.
- Track live flight status and receive notifications.
- Earn/Redeem rewards across bookings.

OCCASIONAL FAMILY FLIERS

Name: Neha Patel
Role: Product Marketer, working parent
Age: 37
Location: Ahmedabad, India
Quote: "With kids and bags, I need clear guidance and someone to help us through the terminal."

About Neha

Flies for vacations and family visits. Values Pranaam meet-and-greet, porter services, parking pre-book, terminal navigation, F&B pre-order, and amenities like baby-care rooms—all discoverable in one app.

Behavioral Considerations
- Needs step-by-step guidance and time-to-gate indicators.
- Prefers to finalize services (porter, parking, meals) the night before.

Frustrations
- Uncertainty about where to go next with kids in tow.
- F&B queues at family mealtimes.

Goals
- Smooth curb-to-gate hand holding; minimal waiting.
- Keep kids comfortable (baby-care rooms, timely meals).

Tasks
- Book Pranaam; add porter service for baggage.
- Reserve parking; use in-app maps & navigation.
- Pre-order F&B and pick up near the gate.
- Check live flight status and boarding alerts.

REWARDS-MAXIMIZERS (Payments-first Users)

Name: Vikram Sinha
Role: Equity Research Analyst
Age: 31
Location: Bengaluru, India
Quote: "If points and card benefits auto maximise, I'll route more spend here."

About Vikram

Optimises every rupee via Adani Rewards, uses the Adani One ICICI Bank Credit Card perks, and even pays bills (BBPS) within the app to consolidate rewards across travel and non-travel spends.

Behavioral Considerations
- Wants transparent earn-/burn math and a single rewards ledger.
- Prefers bill-pay flows that are friction-light with multiple payment options.

Frustrations
- Fragmented view of rewards across airport vs. bill-pay categories.
- Not always sure when to use points vs. card offers for best value.

Goals
- Maximise total value from points + card benefits on every transaction.
- Keep routine bill payments inside the app for convenience and rewards consolidation.

Tasks
- Apply/manage Adani One ICICI Bank Credit Card; use at airports for accelerated rewards.
- Pay bills (electricity, gas, mobile, FASTag, etc.) within the app.
- Redeem rewards across F&B, retail, parking, duty-free, and meet-and-greet.

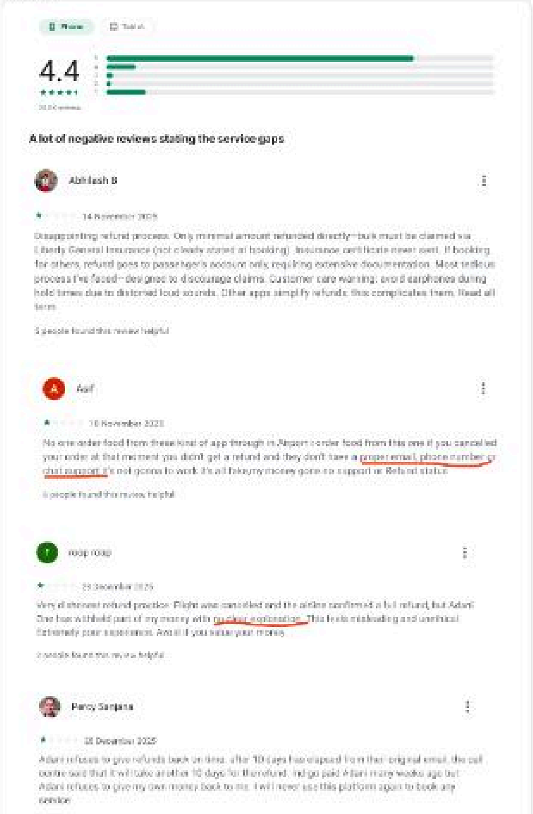
Reviews



A lot of negative reviews stating the service gaps

Abhilash B

★☆☆☆☆ 14 November 2025

Disappointing refund process. Only minimal amount refunded directly—bulk must be claimed via Liberty General Insurance (not clearly stated at booking). Insurance certificate never sent. If booking for others, refund goes to passenger's account only, requiring extensive documentation. Most tedious process I've faced—designed to discourage claims. Customer care warning: avoid earphones during hold times due to distorted loud sounds. Other apps simplify refunds; this complicates them. Read all terms.

★☆☆☆☆ 29 December 2025

Very dishonest refund practice. Flight was cancelled and the airline confirmed a full refund, but Adani One has withheld part of my money with no clear explanation. This feels misleading and unethical. Extremely poor experience. Avoid if you value your money.

2 people found this review helpful

Percy Sanjana

★☆☆☆☆ 28 December 2025

Adani refuses to give refunds back on time. after 10 days has elapsed from their original email, the call centre said that it will take another 10 days for the refund. Indigo paid Adani many weeks ago but Adani refuses to give my own money back to me. I will never use this platform again to book any service

Patil Prime

★☆☆☆☆ 10 January 2026

This app doesn't have any email verification mechanism. Anyone can put anyone elses email id and start using the app. Very sad to see this 2025

Cut of City

★☆☆☆☆ 13 October 2025

Very bad experience with Adani One app! I booked a hotel through the app, but the hotel denied check-in citing an unmarried couple policy that was never shown anywhere. Customer support sent me a random screenshot from their website instead of helping. They refused a refund and said the hotel denied it, even though payment was made through Adani One. Totally unprofessional and mentally stressful. Not recommended!

Saiko

★★★★☆ 11 October 2025

Nice app, ordering food with it easy although the food outlets rarely confirm(pickup) or send updates you need to come down and tell them to prepare food, also you lose coupon (very nice and generally abundant) if your payment fails which is quite bad, it also takes a bit of time to update your gate no if your gate changes, other than that the app does what it promises

View Full Research Board

What I Found - 4 Journeys:

Payments & Refunds

Sentiment: Frustrated - Users are not angry about how long refunds take. They are anxious because they don't know what is happening. [illegible]

Users are more concerned about not knowing than about speed itself.

Flight Booking

Sentiment: Frustrated - The "Pending" status [illegible]

System behaviour appears logical internally but is completely unpredictable to users due to missing communication

Airport F&B

Sentiment: Frustrated - [illegible]

Digital-physical mismatch breaks trust immediately, regardless of how good the UI looks.

Lounge Access

Sentiment: Neutral to Frustrated - [illegible]

Mandatory app dependency reduces perceived value in premium experiences.

The Central Insight - Experience Ownership VS System Ownership

[illegible]

WHO POWERS EACH EXPERIENCE | ECOSYSTEM & DEPENDENCY MAPPING

S.No.	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
1	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
2	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
3	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
4	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
5	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
6	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
7	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
8	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
9	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
10	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
11	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]

[illegible]

This creates a critical distinction:

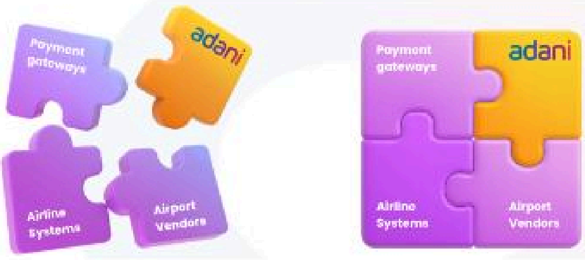
System ownership: [illegible]

Experience ownership: [illegible]

Technical success ≠ Perceived success.

Operational recovery ≠ Emotional recovery.

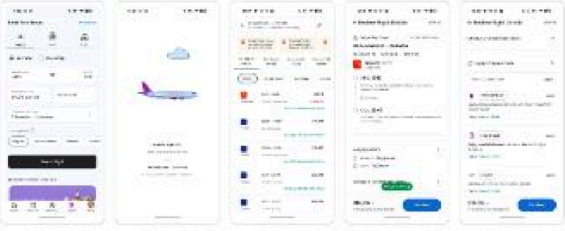
[illegible]

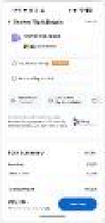


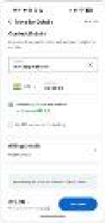
Journey Maps:

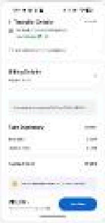
[illegible]

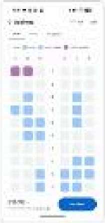
FLIGHT TRAVEL BOOKING (1 WAY TRIP)

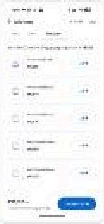


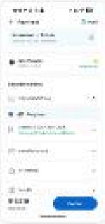


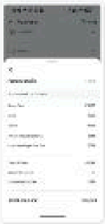






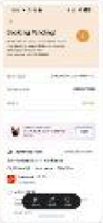


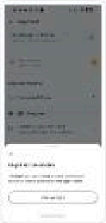




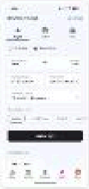
Cepby payment screen opens*

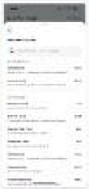
Doesn't allow screenshot for privacy and security reasons

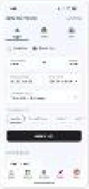


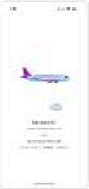


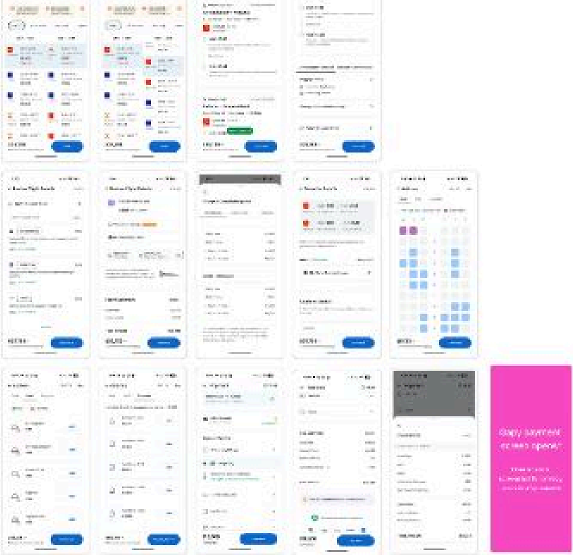
FLIGHT TRAVEL BOOKING (ROUND TRIP)



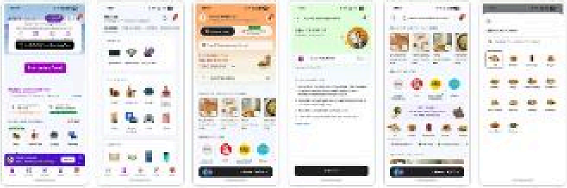


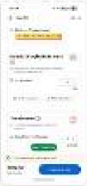


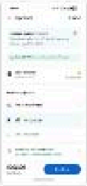


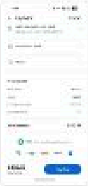


F&B FLOW (COLLECT AT COUNTER)



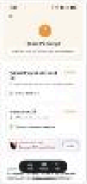




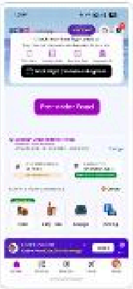


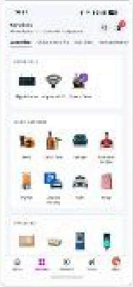
Only payment screen opens

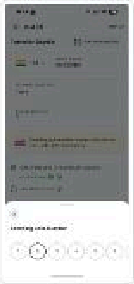
[illegible]



F&B FLOW (DELIVERY AT GATE)

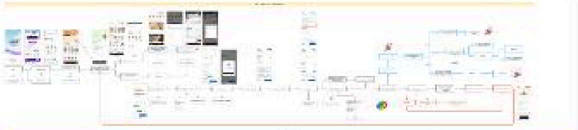






Gpay payment screen opens*

Doesn't allow screenshot for privacy and security reasons



Severity and Risk Prioritization:

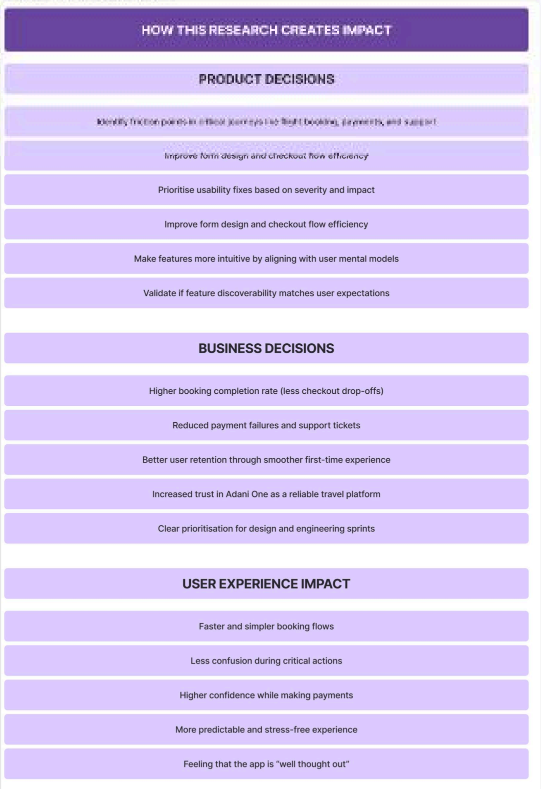
[illegible]

Journey	Trust Risk	Business Impact	Priority
Payments & Refunds	Very High	Very High	🔴 Immediate
Flight Booking (Retry & Pending)	Very High	High	🔴 Immediate
Airport F&B Fulfilment	High	Medium	🟠 Short-term
Lounge Access	Medium	Medium	🟡 Medium-term

How This Research Creates Impact:

[illegible]

How this research creates impact?



HOW THIS RESEARCH CREATES IMPACT

PRODUCT DECISIONS

Identify friction points in critical journeys like flight booking, payments, and support

Improve form design and checkout flow efficiency

Prioritise usability fixes based on severity and impact

Improve form design and checkout flow efficiency

Make features more intuitive by aligning with user mental models

Validate if feature discoverability matches user expectations

BUSINESS DECISIONS

Higher booking completion rate (less checkout drop-offs)

Reduced payment failures and support tickets

Better user retention through smoother first-time experience

Increased trust in Adani One as a reliable travel platform

Clear prioritisation for design and engineering sprints

USER EXPERIENCE IMPACT

Faster and simpler booking flows

Less confusion during critical actions

Higher confidence while making payments

More predictable and stress-free experience

Feeling that the app is “well thought out”

This research bridges the gap between how the app is built and how users actually experience it, ensuring that design decisions are driven by real usability insights rather than assumptions.

We're shaping **product direction, business success, and user trust.**

Reflection & Learnings

Throughout the research I kept returning to two questions: where would a breakdown cause the highest loss of trust? and is the system giving the user enough confidence about what is happening?

Beyond task completion, I tracked emotional cues - pauses, repeated taps, out-loud questions, and the relief users expressed only after seeing explicit confirmation. In several cases users completed the task successfully but still felt uncertain. That gap between system success and user confidence is where the real research lives.

What I'd do differently:

More diverse users including first-time travellers, more open-ended tasks giving goals rather than steps, and more time observing post-booking behaviour around refund confidence.

> ***"Users are often willing to forgive things going wrong. But they struggle deeply when they don't understand what is happening."***
